(A) Incineration
 8. What is the normal score in Mini Mental status examination?
(A) 25–30
 9. The reason for urbanization is
(D) Industrialization
 10. Which is the most appropriate time of IUD insertion ?
(A) During or within 10 days of menstruation
 11. Fatty acids can be transported into and out of cell membrane by
(B) Facilitated transport
 12. Which of the following might help the pregnant client to overcome first–trimester morning sickness?
(A) Eat dry crackers before arising
 13. The position of the uterus is
(B) Anteverted & anteflexed
 14. Rational behind play therapy is
(A) Sensorimotor & Intellectual development

- 15.** The amount of sperm present in seminal fluid is
(A) 100 million/ml
- 16.** Asymmetrical enlargement of the uterus when there is lateral implantation, is called as
(B) Piskacek's sign
- 17.** Which committee is also known as Health Survey and Development Committee?
(A) Bhore committee
- 18.** What do you mean by incidence ?
(A) New cases of any disease
- 19.** IMNCI means
(D) Integrated Management of Neonatal and Childhood Illness
- 20.** Yellow colour is the coding for
(D) Human Anatomical waste, Animal waste, Biotechnological waste & Soiled waste
- 21.** ORS means
(B) Oral Rehydration therapy
- 22.** The stage of disease cycle in which signs and symptoms are noticed:
(B) Fastigium
- 23.** Indian Lunacy Act was enacted in the year
(A) 1912
- 24.** A study that examines data collected in the present:
(C) Descriptive research
- 25.** A nurse is planning care for a postpartum client who had a vaginal delivery 2 hours ago. The client had a midline episiotomy and has several hemorrhoids. What is the priority nursing diagnosis for this client ?
(A) Acute pain
- 26.** According to Maslow, which is the highest level of need of an individual ?
(C) Self actualization
- 27.** Which bacilli is responsible for the acidic medium in vaginal secretion?
(A) Doderlein's bacilli

- 28.** Which of the following food item is rich in Vitamin C?
(B) Oranges
- 29.** Community Health Centre covers the population of
(C) 1,00,000–1,20,000
- 30.** Kellys suture is done in
(A) Cervical incontinence
- 31.** The IQ level of Moderate Mental Retardation:
(B) 35–50
- 32.** Which of the following coagulation factor is not increased during pregnancy?
(D) Factor XI
- 33.** In a patient receiving Total Parenteral Nutrition (TPN), which of the signs indicate hyperglycemia ?
(D) Weakness, thirst and increased urine output
- 34.** Causative Organism of AIDS is
(C) Retrovirus
- 35.** Validity of tool means
(C) It measures what it is supposed to measure.
- 36.** Which is an example of Atypical Antipsychotics ?
(C) Risperidone
- 37.** The main clinical symptoms of Hiatal hernia is
(A) Heartburn
- 38.** Causes of High infant mortality rate is
(D) All of these

(D) Fruity breath odour and decreasing level of consciousness
- 74.** Which method is used to open the airway in a road traffic accident victim ?
(C) Jaw thrust maneuver
- 75.** Administration of measles vaccine to child is a measure of
(C) Specific protection
- 76.** Just before beginning blood transfusion, the nurse assesses which priority item ?
(A) Vital Signs
- 77.** To diagnose dysthymia, the mood disturbance should last for at least
(D) 2 years
- 78.** An intravenous (IV) site is cool, pale & swollen & the solution is not infusing. Which complication has occurred ?
(C) Infiltration
- 79.** Tools of measurement in epidemiology are
(D) All of these
- 80.** Which size of needle is used to give IM (intramuscular) injection?
(B) 22–23 gauge
- 81.** The length of the uterine tube is approximately
(C) 10 cm
- 82.** A patient requires rapid transfusion of several units of blood. Which device is used to prevent cardiac dysrhythmias?
(D) Blood–warming device

- 83.** EBF is
(C) Exclusive Breast Feeding
- 84.** To administer IV fluids, to the children, the nurse should know
(A) To calculate the fluid requirement
- 85.** Features of good unit planning are
(D) All of these
- 86.** Causative organism of diarrhoea in AIDS patient is
(C) Cryptosporidium
- 87.** Which one of the following conveys the acceptance of the patient exactly as she/he is?
(D) Talk with purpose
- 88.** Examples of House fly borne diseases are, except
(D) Trench fever
- 89.** Main principle in neonatal resuscitation
(C) Airway Breathing and Pulse
- 90.** Tuberculosis is a/an
(B) Air borne disease
- 91.** A plan showing the placement of students in theory and practical area is called
(C) Clinical rotation plan
- 92.** Which of the following is an example of neurotransmitter?
(A) Acetylcholine
- 93.** Which of the following may increase in pregnancies complicated by anemia in the second trimester?
(B) Preterm birth
- 94.** Referring the patients main thought as he expressed:
(B) Restating
- 95.** Which model states that most frequently occurring behaviour as normal?
(C) Statistical
- 96.** Safe Disposal methods of Bio–medical waste exclude
(C) Classification and treatment

97. What is the principal erogenous organ in women?

(C) Clitoris

98. Weaning should start from the month of

(B) 6th month

99. BFHI means

(C) Baby Friendly Hospital Initiative

100. Formula to calculate the degree of Nutrition for 4 year baby:

(D) Age in years \times 2 + 8
